Non-Resident Students Oversight

1. Is your district currently a host district for a 1306 facility?

No

1. Describe the host's educational oversight to ensure students with disabilities are educated in the least restrictive environment while in the 1306 facility? (If not a host, answer as if you were.)

A Free Appropriate Public Education is provided to all students with disabilities. There are enrollment procedures at the Elementary, Middle and High School buildings and through the Special Education Office. The process is reviewed annually with the District staff. When new students enroll into the district, the guidance office contacts each special education office in the previous district to ensure that all records were sent from the sending district. If records are not received from the sending district, the Special Education Office follows up with a request for records. The Guidance Offices and the Special Education Office ensure that each student is enrolled within 5 business days and receives FAPE. IEPs are adopted upon enrollment and new NOREPs are issued. Choosing the Least Restrictive Environment is the principle that guides IEP teams when determining a student's educational placement, the team first considers regular education with supplementary aids and services and proceeds through the continuum of alternative placements.

2. Describe the district's procedures for communicating with 1306 facilities and how the district ensures a successful transition back to school?

The Director of Special Education participates in all IEP and Evaluation meetings for students in a 1306 facility. During meetings student progress and transition plans are discussed and addressed on the plan for transition back to school. The 1306 facilities submit quarterly progress reports on student goals to the District. Additional communication occurs periodically to address shared responsibilities, transportation, Assistive Technology, and other supplementary aids and services for the students in a 1306 facility.

Incarcerated Students Oversight

- Does the district have an adult correctional facility that houses juveniles within its geographical boundaries?
Yes

§1306.2 Facilities			
Facility Name	Facility Type	Services Provided By	Student Count
Greene County Prison	Prison	Other	2

- Describe the system of oversight the District would implement to ensure that all incarcerated students who may be eligible for special education are located, identified, evaluated and when deemed eligible, are offered a free appropriate public education (FAPE).
The District's annual public notice is published in local newspapers, on the District's website, and copies are available at the Elementary School, Middle School and High School thereby making community members aware of the available screenings and services offered by the school district. When a responsible party (parent, guardian, and legal representative) requests an evaluation for a student who resides in District, the District conducts a Multidisciplinary Evaluation within 60 days of the permission receipt and proceeds with the special education process. When the District is aware that a student with a disability has been incarcerated, the LEA contacts a representative of the correctional facility to expedite the process as well as forwarding all the necessary paperwork to the facility to ensure an appropriate educational program is in place for that student. When the District receives Determination of District of Residence for Students in Facilities and Institutions (From 4605) the District verifies the family's residency and signs and returns the form. This form begins the process for the District to initiate contact with the institution and communication about the student's needs and educational programming.

Least Restrictive Environment

1. Review the district's data for Least Restrictive Environment. Highlight areas of improvement.

Based on the 2019-2020 Special Education Data Report (based on 12/1/19 Child Count) 50.6% of the District's Special Education students were inside the regular education classroom 80% or more, while the State percentage was 61.5%. The District had too small of a group size of Special Education students inside the regular class less than 40%. The State percentage was 9.6% of Special Education students inside the regular education class less than 40%. The District has 6.4% of Special Education students in other settings, while the State average is 4.8%. Areas to improve would include increasing the percentage of our Special Education population being inside the regular education classroom 80% or more and decreasing our percentage of special education students in other settings, if possible and if determined to be the least restrictive environment.

2. What universal practices does the district utilize to address the academic and social/emotional needs of all students in need of accommodations to their learning environments?

The Central Greene School District procedures have been established for all IEP meetings. The first option for every student is regular education, moving through the continuum of services until the team members agree upon the most appropriate setting/program/placement. The student's needs are always the determining factor. IEP Team meetings begin by focusing on the student's current situation and classroom performance. Every measure is taken to ensure that the entire team is physically present at the IEP Team meetings to discuss the student and their progress. When physical participation is not possible, the case manager contacts the parent to discuss the possibility of a team member providing written input for the meeting. A. The team reviews assessment data including results from standardized tests, curriculum based assessments, daily classroom performance (grades, attendance, and discipline), general education teacher input, parent input, and student input (if appropriate). B. The team reviews instructional strategies that have been implemented in the general education classroom to address the student's specific problem areas. C. The team discusses the effectiveness of these strategies/modifications/accommodations in relation to the individual student's progress compared to his classmates and curricular benchmarks. D. The team discusses how the student's difficulties impact his/her achievement and progress in the general education curriculum. E. The IEP Team develops specific goals for the student that will allow progress and skills to be quantified and monitored. F. The IEP Team reflects on the effectiveness of the strategies currently being employed in the classroom and brainstorms any additional strategies/accommodations that would be necessary and are directly related to the student's targeted difficulty and goal. G. In this brainstorming session, the IEP Team considers the need for related services and supports for student or teacher to facilitate student success toward his/her goal. Placement options are not considered until the body of the IEP has been developed. A. The goal to provide services within the general education classroom to allow for maximum participation with non-disabled students is stressed at every IEP meeting. B. The team members discuss how the student's plan can be implemented in different settings- General Education classroom, Special Education classroom, etc. C. The team considers input from all members including the General Education teacher, parent, student (if appropriate) to determine if these strategies are appropriate and able to be implemented in the General Education classroom or if additional supports are necessary. - If members agree that the program can be implemented in the General Education classroom, that placement option is chosen. - If members agree that the student demonstrates need for additional supports, the IEP Team discusses providing supplementary services (such as a resource room or itinerant instruction) in conjunction with regular class placement. After the IEP is completely developed, a NOREP is issued for parent approval. The array of placement options are outlined and reviewed with the parent. A. If parent agrees and signs the NOREP, the placement begins. B. If parent disagrees or refuses to sign the NOREP, dialogue continues until consensus about student needs and appropriate programming is reached.

3. Describe the academic programming and training efforts the LEA utilizes to ensure meaningful participation of students with disabilities in the general education curriculum.

Some students receive the majority of their program while in the regular educational environment. They are supported with the full continuum of services in all environments. In the regular education classroom, the regular education teacher will deliver modifications and specially designed instruction as necessary. Support may be provided by a paraprofessional if needed. The student will receive instruction in the special education classroom only if his/her needs are such that they cannot be met in the regular education classroom. The District's goal is for students with disabilities to be included into the regular education classroom to the maximum extent appropriate. At all levels within the District, students with disabilities are being served in general classrooms to the greatest extent possible. Both general and special education teachers monitor the progress of students with disabilities in the general classroom. In addition, both ensure that program modifications and specially designed instruction are implemented in accordance with the IEP. There are many opportunities for students with disabilities to interact with non-disabled peers throughout the school day. Elementary students are almost always included in the general education environment for homeroom, breakfast/lunch, art, gym, music, recess, assemblies and programs, and other school-wide events. Middle and High school students are almost always included in the general education environment for homeroom, breakfast, lunch, electives, rotation classes and other school wide and extracurricular programs and events. The only exceptions to these are determined by the IEP Team in consideration of the least restrictive environment for the individual. Regular Education curriculum is utilized whenever possible in the Learning Support Program to the fullest extent. A significant portion of the students are able to complete the regular education coursework with accommodations. Sometimes these accommodations can be supported in the general education classroom while at other times, the accommodations are too significant for the general education classroom environment, therefore the support classroom must be utilized to meet the individual needs of the student. Students within the District do utilize the special education curriculum when it is necessary to meet their individual learning needs. This curriculum is aligned with the Pennsylvania Core Standards. When this option is necessary, it is noted within the students' IEP. When appropriate, students with disabilities who are educated outside of the District pursue regular curricula and activities, too. Their progress is evaluated regularly by the IEP Team to determine readiness for placement in a less restrictive environment.

4. Describe the supplementary aids and services the LEA utilizes to ensure meaningful participation of students with disabilities in extracurricular activities. The Central Greene School District provides a wide range of services for children with disabilities. We offer learning and life skills support in the regular school setting with levels of intervention ranging from itinerant, supplemental and full time. We provide students an education in the least restrictive environment with the help of supplementary aides and services according to their Individual Education Plan. These supplementary aids and services could include but are not limited to the following: Framework for Considering the Full Range of Supplementary Aids and Services (SAS) Category Examples Collaborative - Adults working together to support students • Scheduled time for co-planning and team meetings • Instructional arrangements that support collaboration (e.g. paraeducator support) • Professional development related to collaboration • Coaching and guided support for team members in the use of assistive technology for an individual student • Scheduled opportunities for parental collaboration • All school personnel collaborate in the development and delivery of SAS Instructional - development and delivery of instruction that addresses diverse learning needs • Providing modified curricular goals • Providing alternate ways for students to demonstrate learning • Providing test modification • Providing alternate materials and/or assistive technology (e.g., materials on tape, transcribe text into Braille, large print, alternate computer access) • Providing instruction on functional skills in the context of the typical routines in the regular classroom • Changing method of presentation • Using reader services • Providing research based supplementary materials • Providing instructional adaptations (e.g., pre-teaching, repeating directions, extra examples and non-examples) Physical - adaptations and modifications to the physical environment • Furniture arrangement in environments • Specific seating arrangements • Individualized desk, chair, etc. • Adaptive equipment • Adjustments to sensory input (e.g., light, sound, etc.) • Environmental Aids (e.g., classroom acoustics, heating, ventilation) • Structural Aids (e.g., wheelchair accessibility, trays, grab bars) Social-Behavioral - supports and services to increase appropriate behavior and

reduce disruptive or interfering behavior • Social skills instruction • Counseling supports • Peer supports (e.g., facilitating friendships) • Individualized behavior support plans • Modification of rules and expectations • Cooperative learning strategies.

5. Describe the District procedures, which ensure that, to the maximum extent appropriate, children with disabilities placed in private institutions are educated with non-disabled children and have the opportunity to participate in district lead extracurricular activities?

When appropriate, students with disabilities who are educated outside of the District pursue regular curricula and activities, too. Their progress is evaluated regularly by the IEP Team to determine readiness for placement in a less restrictive environment. The District has developed relationships with Intermediate Unit #1, Transformation Learning, New Story in Monroeville, and the Watson Institute to help provide the appropriate education for students. By working with the outside placement facilities, Greene County Mental Health for resources, and the Intermediate Unit the District is able to provide the best and most appropriate placement and/or supports for our students. District activities are shared via Facebook, Twitter and Instagram in order to help make all students and families aware of the opportunities to participate in events held within the district. Students still have the opportunity to participate in extracurricular activities, including sports. High school students in outside placements also have the opportunity to attend the Career and Technology Center.

6. Discuss the district’s need to build capacity and expand programs and services in an effort to provide a continuum of services. (Consider the out of district placement chart)

When the need arises, the District will contact consultants, mainly from Intermediate Unit #1 and PaTTAN, for training and consultation purposes. The District has utilized the Watson Institute and the Intermediate Unit's Training and Consultation (TAC) teams for Autism, Behavior and Transition. The Watson Institute consultant and the TAC team members have provided consultation and collaboration with District personnel by conducting on-site observations and training. The District has developed relationships with Transformation Learning, New Story in Monroeville, and the Watson Institute to help provide the appropriate education for students. By working with the outside placement facilities, Greene County Mental Health for resources, and the Intermediate Unit, the District is able to provide the best and most appropriate placement and/or supports for our students.

Positive Behavior Support

Date of Approval
2022-01-18

Uploaded Files
113.2 from 1.18.22.pdf

1. How does the district support the emotional, social needs of students with disabilities?

The current Board-approved Behavioral Support policy states that positive, rather than negative, measures must form the basis of behavior support programs to ensure that all students must be free from demeaning treatment, the use of aversive techniques, and the unreasonable use of restraints. In the past the District has trained para-professionals and teaching staff using the Safety Care program. Additionally, para-professionals, administration and school counselors have received training on de-escalation techniques. The district has been having conversations about multi-tiered systems of supports (MTSS) for behaviors, academics and attendance. Teachers will be receiving training on how implementing policies and procedures and teaching the students those procedures, will decrease behavior and increase achievement.

2. Describe training provided to staff in the use of positive behavior supports, de-escalation techniques and responses to behavior that may require immediate intervention.

The Superintendent or designee shall provide regular training and retraining of staff in the use of specific procedures, methods and techniques, including de-escalation strategies, emergency responses, restraints and seclusions, that will be used to implement positive behavior supports or interventions in accordance with students' IEPs, Positive Behavior Support Plans and Board policy. In the past the District has trained para-professionals and teaching staff using the Safety Care program. Additionally, para-professionals, administration and school counselors have receive training on de-escalation techniques. The district has been having conversations about multi-tiered systems of supports (MTSS) for behaviors, academics and attendance. Teachers will be receiving training on how implementing policies and procedures and teaching the students those procedures, will decrease behavior and increase achievement.

3. Describe the district positive school wide support programs.

The district has been having conversations about multi-tiered systems of supports (MTSS) for behaviors, academics and attendance. Teachers will be receiving training on how implementing policies and procedures and teaching the students those procedures, will decrease behavior and increase achievement. Handbooks at each building level outline expectations, which are reviewed with students annually.

4. Describe the district school-based behavior health services.

The District has a mental health program called Raider Wellness. It is a K-12 school based mental health service and drug and alcohol counseling. Students have access to a therapist in the school setting to address their mental health and/or substance abuse issues. Regular education and special education students are eligible to participate in the Raider Wellness Program. This service is provided based on parent or student (if old enough) request. The family participates in an intake prior to receiving services. Therapists, contracted through the Intermediate Unit, see students in the school setting as outpatient therapy. A psychiatrist is also available through the Raider Wellness Program to come into the school and meet with students to provide medication

management. Social work services are available for special education students, if the service is written into their IEP. All three schools in the district have a Student Assistance Program to help address mental health needs and to then refer students, if needed to the appropriate program. The elementary school has two guidance counselors who work with the students in their individual classrooms and on an individual basis. The middle school has one guidance counselor, and the high school has two guidance counselors.

5. Describe the district restraint procedure.

When an intervention is necessary to address problem behavior, the types of intervention chosen for a student shall be the least intrusive necessary. The Director of Special Education or designee shall notify the parent/guardian as soon as practicable of the use of restraints to control the aggressive behavior of the student and shall convene a meeting of the IEP team within ten (10) school days of the use of restraints, unless the parent/guardian, after written notice, agrees in writing to waive the meeting. At this meeting, the IEP team shall consider whether the student needs a functional behavioral assessment, re-evaluation, a new or revised positive Behavior Support Plan, or a change of placement to address the inappropriate behavior. The use of restraints shall not be included in the IEP for the convenience of staff, as a substitute for an educational program, or employed as punishment. Restraints may be included in an IEP only if: The restraint is used with specific component elements of a positive Behavior Support Plan. The restraint is used in conjunction with teaching socially appropriate alternative skills or behaviors. Staff are authorized to use the restraint and have received appropriate training. Behavior Support Plan includes efforts to eliminate the use of restraints. Mechanical restraints, which are used to control involuntary movement or lack of muscular control of students when due to organic causes or conditions, may be employed only when specified by an IEP and as determined by a medical professional qualified to make the determination, and as agreed to by the student's parents/guardians. Mechanical restraints shall prevent a student from injuring him/herself or others or promote normative body positioning and physical functioning. The Superintendent or designee (Director of Special Education) shall maintain and report data on the use of restraints, as required. Entities educating students with disabilities who attend programs or classes outside the district, including private schools, agencies, intermediate units and career and technical schools complete a Restraint Information System Collection (RISC) Offline Entry Form to submit to the District Director of Special Education. The Director of Special Education updates the Pennsylvania Department of Education online Restraint Information System Collection database. If no restraints are reported for the quarter, the Director of Special Education reports that no restraints in the Restraint Information System Collection database.

Intensive Interagency

Please address any areas of concern with students who are placed on Instruction Conducted in the Home or who are at a substantial risk of waiting more than 30 days for an appropriate educational placement.

The district will have one student who is placed on Instruction Conducted in the Home during the time of this Plan. Because this student is medically fragile she receive her instruction and related services in the home setting. Ensuring FAPE: The district has not encountered significant difficulty placing students with disabilities into appropriate educational programs. Strong collaboration exists among the district, Child and Adolescent Social Service Program (CASSP) through Greene County, and the Intermediate Unit 1 Interagency Coordinator. This has allowed us to provide a means for accessing additional community services. The district maintains a positive relationship with governmental agencies including Juvenile Probation, Children and Youth Services and community mental health agencies. These collaborative relationships have allowed each agency to assist parents and students in accessing services to address student and family issues having an impact on educational placement. There are times that some research and networking must be done, but we have established a reliable network of professionals that can be accessed when presented with a challenging case. Hard-to-Place Students When the district suspects that a student requires a more restrictive environment, the district will contact the Intermediate Unit 1 Interagency Coordinator who will arrange an interagency meeting through the local CASSP office to include all agencies that provide support to the student. The IEP Team members will meet to review the IEP to determine if the student's needs are being met and to make necessary changes and/or recommendations. If the Team determines that the student can no longer be served in a public school setting, placement options will then be considered and the district will follow up with making appropriate contacts. In the event that the placement cannot be secured and that the student has been or will be at risk of waiting 30 days or more for an appropriate educational placement, the district will report the required information utilizing the required form to the Pennsylvania Department of Education, updating the information monthly as needed until an appropriate placement has been secured. Additionally, the district will report to the Department of Education all students who are on Homebound Instruction or Instruction in the Home on an appropriate form. Continuum of Supports and Services The district continues to evaluate student needs and special education services available within the home school district on a continuum for individual counseling to group counseling to family counseling when appropriate. As more needs are recognized, additional supports are investigated. The district maintains contacts with other child service agencies by participating with Interagency Team meetings and trainings as necessary. The district also participates in meetings from psychiatric hospitals, partial hospitalization programs as well as residential treatment facilities. The district maintains an ongoing relationship with the Intermediate Unit One Interagency Coordinator and meets at least annually to discuss issues and trainings available outside the district if the district has a specific need. The district is represented at seminars, workshops and other trainings to improve district program capacity. Expansion of Services The district utilizes its contacts within child service agencies to determine what resources a child may be eligible. The LEA representative or social worker will work with the family to complete necessary applications if the student has never been found eligible for medical assistance. The district makes available the necessary documents to support eligibility.

- There are a full range of services, programs and alternative placements available to the school district for placement and implementation of the special education programs in the school district.
- The school district has adopted a child find system to locate, identify and evaluate young children and children who are thought to be a child with a disability eligible for special education residing within the school district's jurisdiction. Child find data is collected, maintained, and used in decision-making. Child find process and procedures are evaluated for its effectiveness. The school district implements mechanisms to disseminate child find information to the public, organizations, agencies, and individuals on at least an annual basis.
- The school district has adopted policies and procedures that assure that students with disabilities are included in general education programs and extracurricular and non-academic programs and activities to the maximum extent appropriate in accordance with an Individualized Education Program.
- The school district will comply with the PA Department of Education, Bureau of Special Education's revision notice process.
- The school district follows the state and federal guidelines for participation of students with disabilities in state and district-wide assessments including the determination of participation, the need for accommodations, and the methods of assessing students for whom regular assessment is not appropriate.
- The school district affirms the Pennsylvania Department of Education that funds received through participation in the medical assistance reimbursement program, ACCESS, will be used to enhance or expand the current level of services and programs provided to students with disabilities in this local education agency.
